PROFILE

I'm a recent graduate with a Bachelor in Computer Science, and a passion for leveraging technology to solve complex problems and create innovative solutions. I have a solid foundation in programming and web development. I'm a strong analytical thinker with excellent problem-solving skills and professional English, and I am always eager to learn and take on new challenges. I am seeking an entry-level position in the technology sector where I can apply my skills and knowledge to make a positive impact.
